

Consultation Exercise

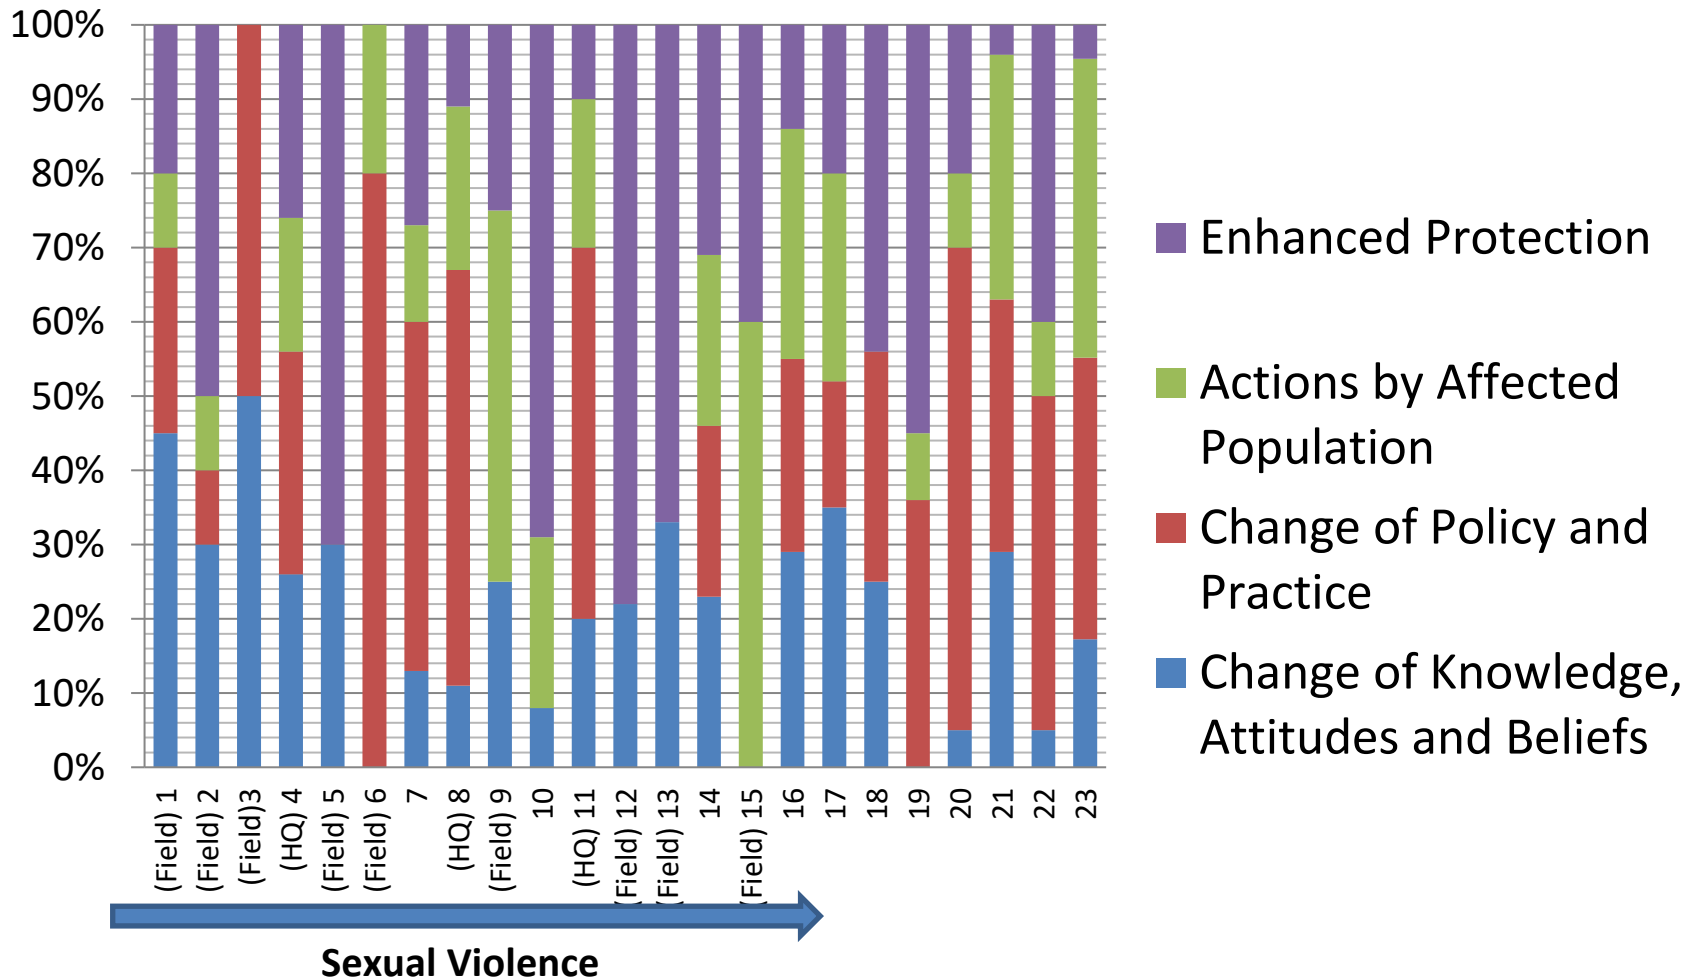

- Identify a protection issue
- What change needs to be brought about?
- What should be measured to see this change?
- Which of these are difficult to measure? Why?
- What are the implications of our inability to measure this issue?
- What practices do we want to see in order to measure this change more effectively?
- What is needed to do this?
- What tools within the program cycle would support better results?

Change

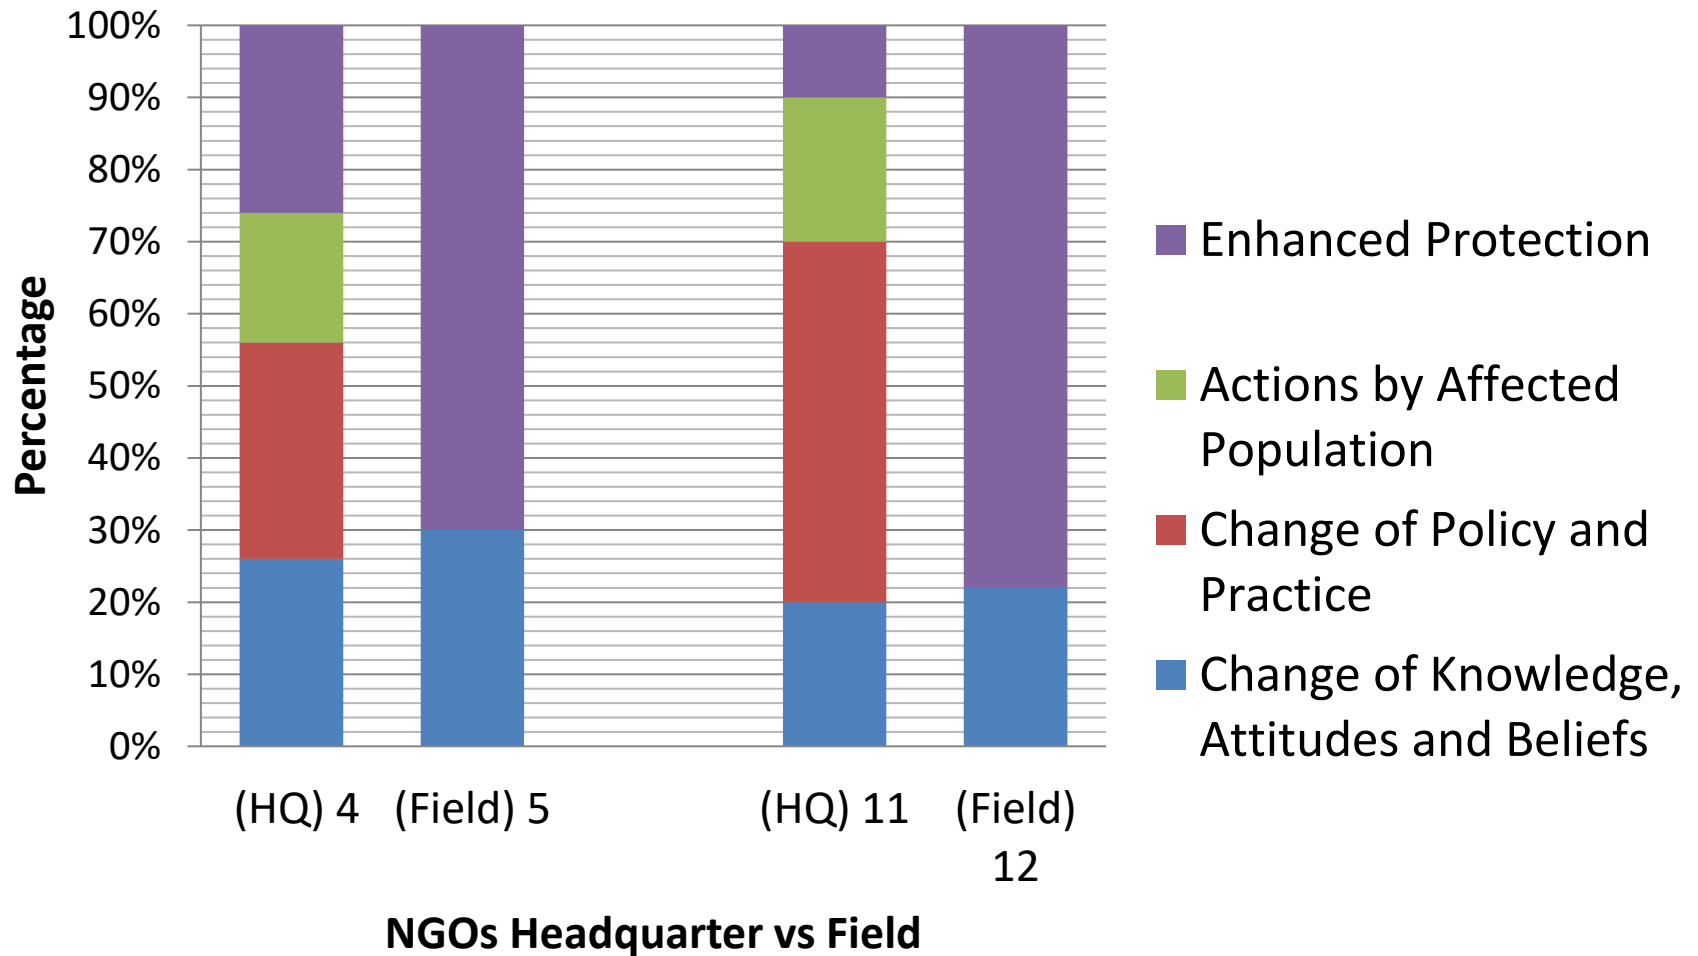

- A Change in Knowledge, Attitudes, Beliefs
- A Change in Policy and Practice
- Actions by Affected Populations
- **Enhanced Protection**

How do NGOs understand results?

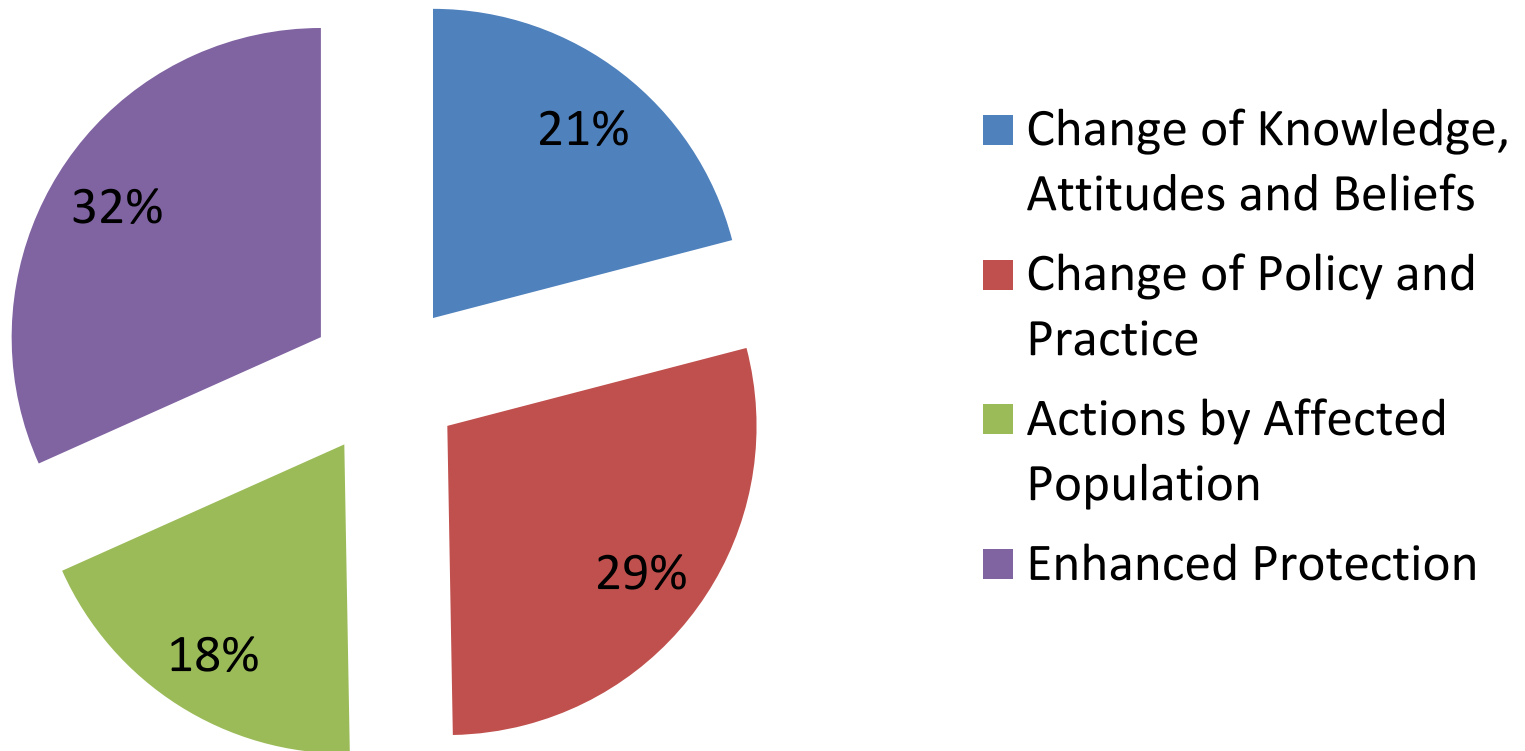

(in terms of change to be brought about through protection programming)

Sample: HQ vs. Field (Sexual Violence)

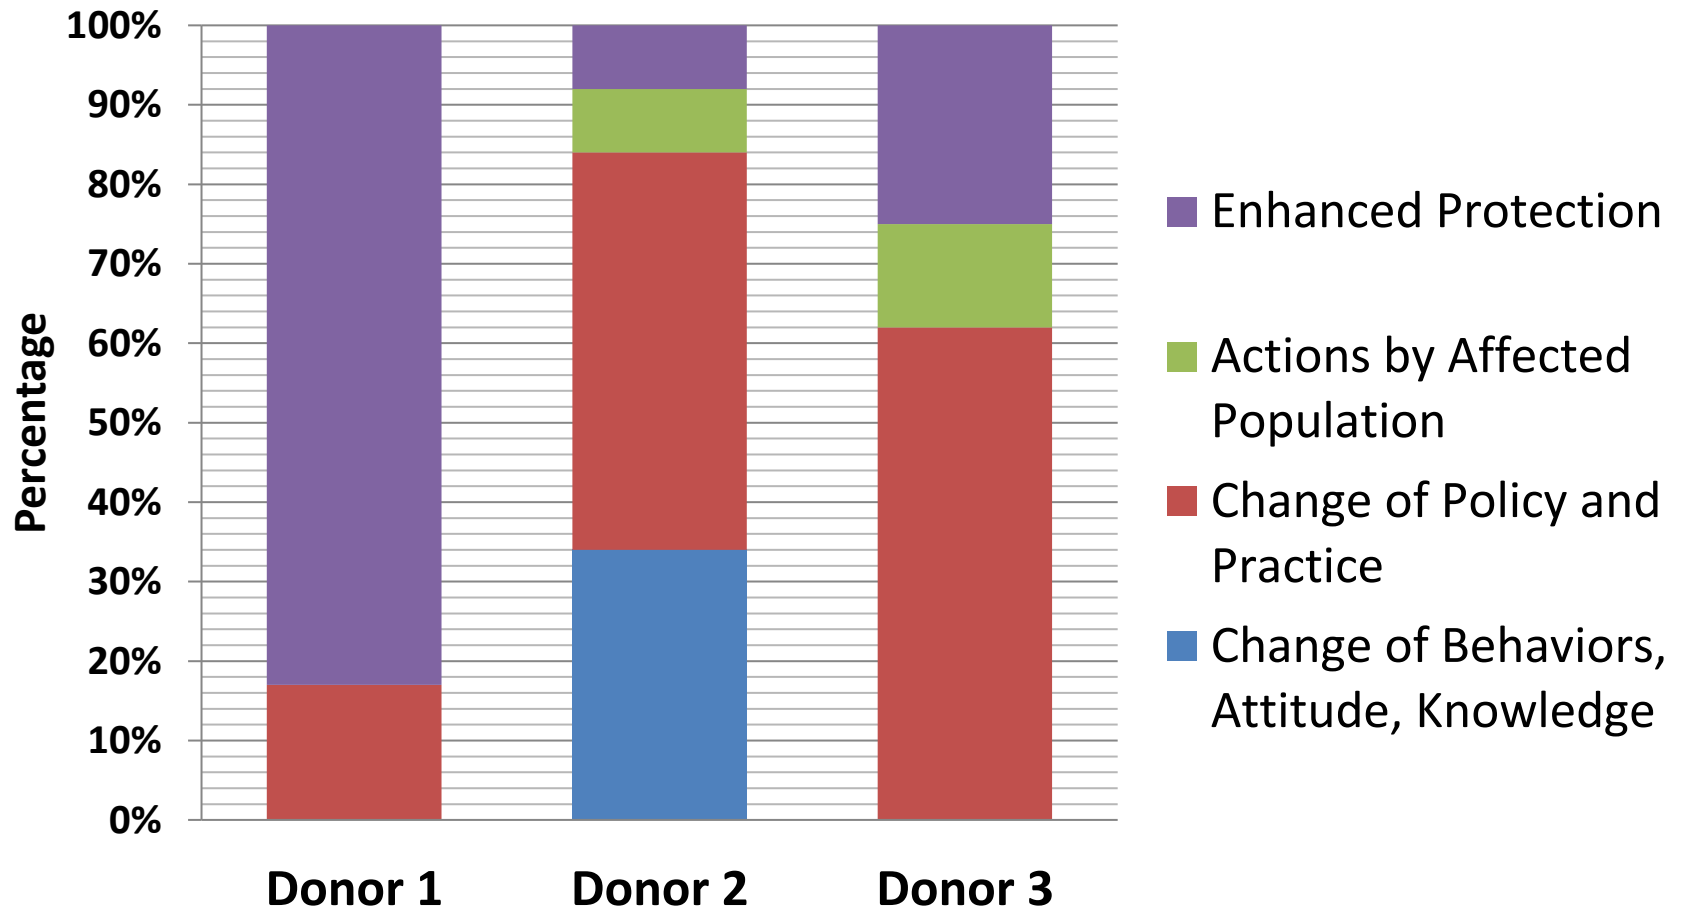

Combined **NGO** Understanding of Results

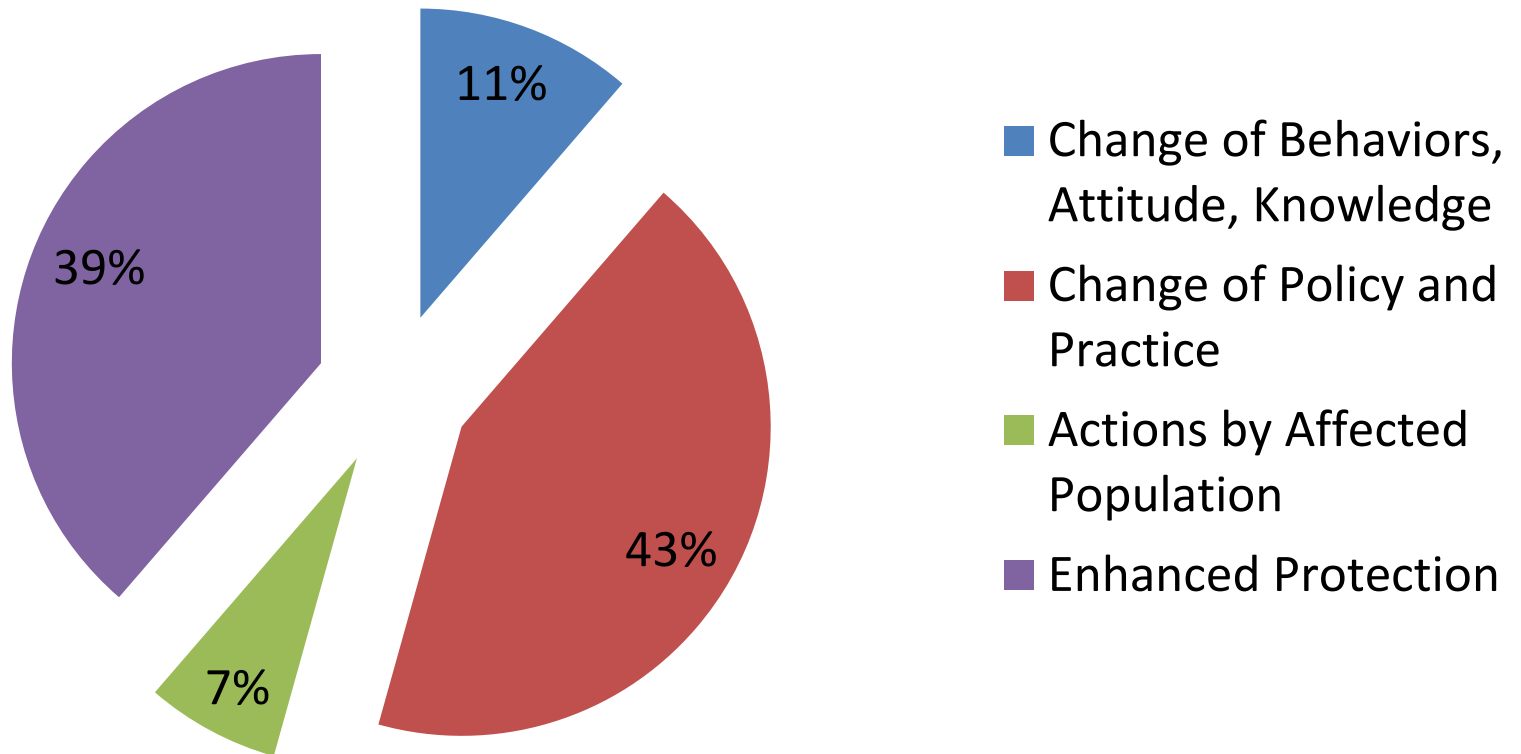

How do **Donors** understand Results?

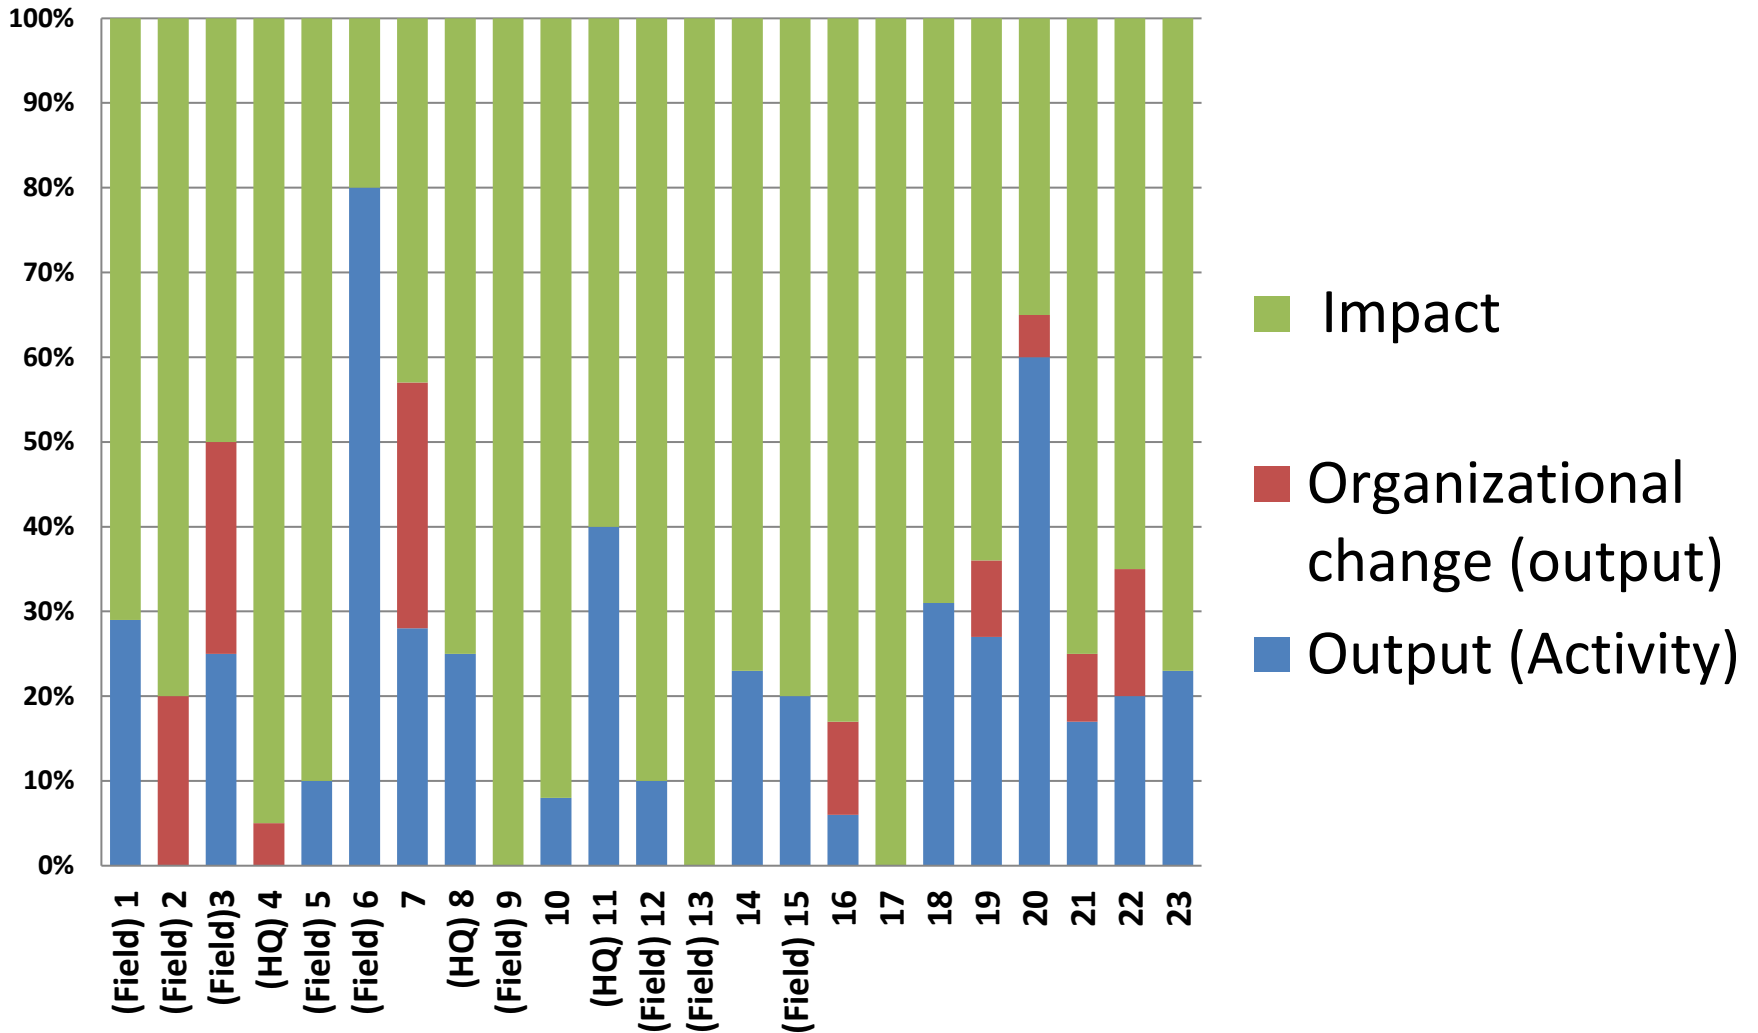

(in terms of change to be brought about through protection programming)

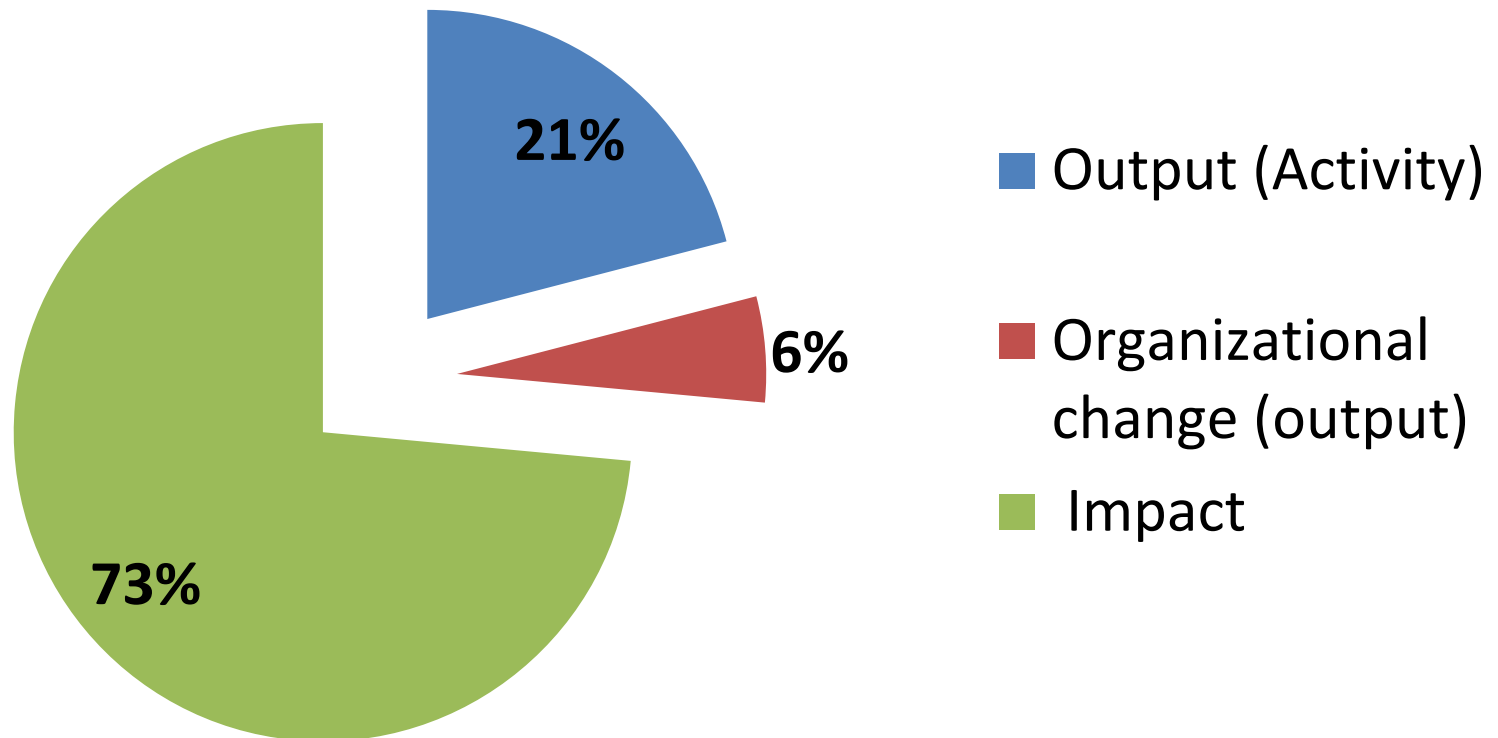

Combined Donor Understanding of Results

NGOs: Is Change Evidenced by Output or Impact?

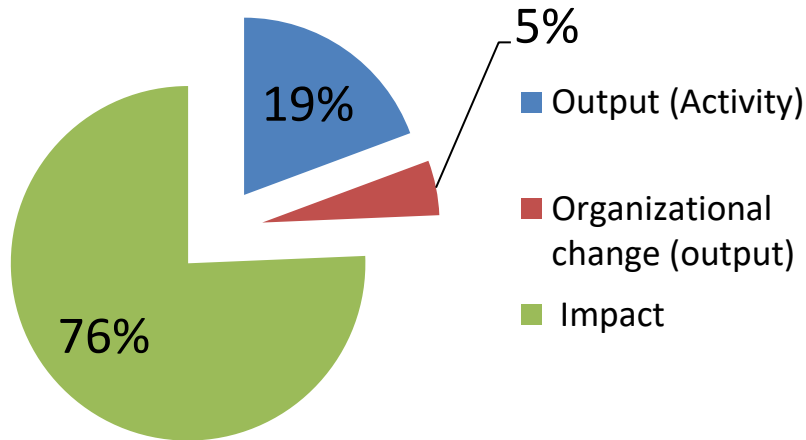

NGOs: Is Change Evidenced by Output or Impact?

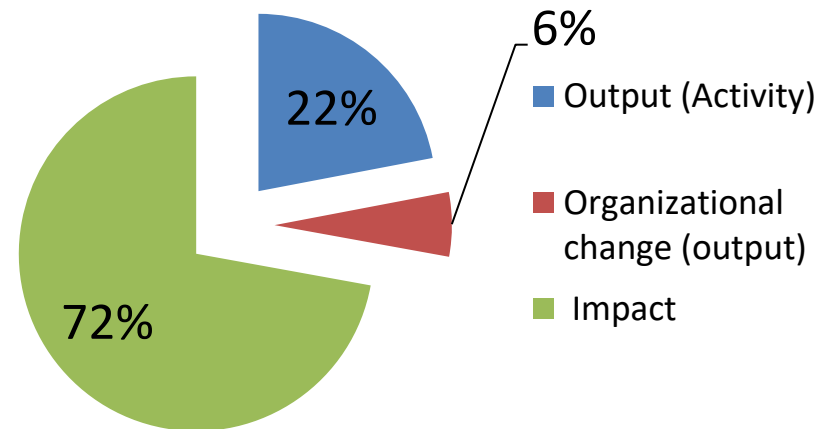

Field vs. Headquarters: Is Change Evidenced by Output or Impact?

Field

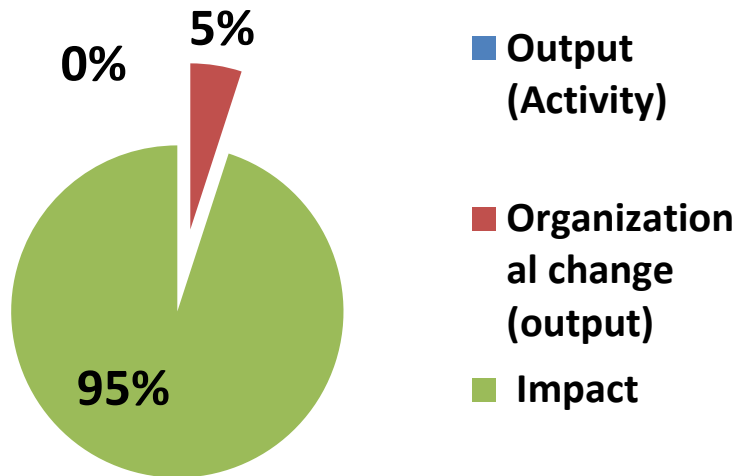

Headquarters

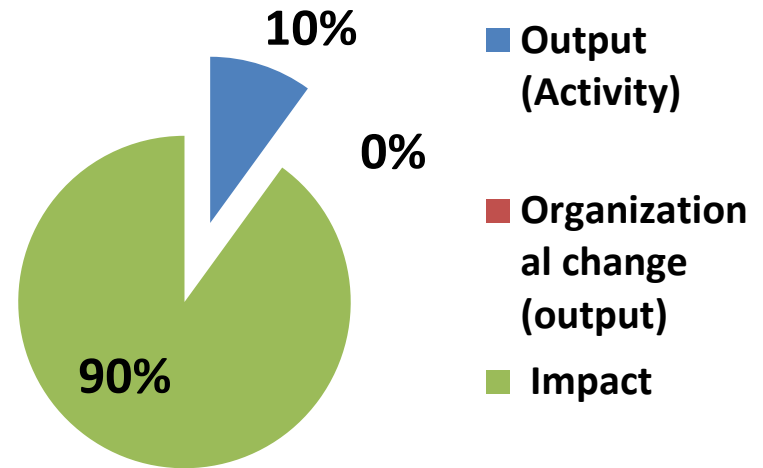

NGO 1: Is Change Evidenced by Output or Impact?
